

Losma has adopted the Legislative Decree 231.

In June 2001 Italian legislation issued the Legislative Decree no. 231. This decree introduces a system of internal supervision and control within companies, as a measure to prevent illicit actions.

In order to strengthen internal control over activities performed, and in order to ensure their performance according to correct, transparent conditions and moreover to prevent illicit actions as exposed in the above decree, since October 2010 LOSMA has adopted Organisational Models, Administration and Control as prescribed in the Legislative Decree 231/2001, together with a company Code of Ethics.

The adoption of Organisational Models, Administration and Control entails, for Losma, the appointment of an own Organism of Supervision which has the task to ensure the functioning and observance of the Models and their respective adjournment.
